

Website Blueprint Book

Astro static architecture, bilingual structure,
page logic, performance rules, and AI handoff -
aligned with Brand Guideline Book v2.0.

VERSION 2.0

STATIC-FIRST

BILINGUAL

DARK EDITORIAL

WEBSITE

SEO

SOCIAL MEDIA

Purpose & Source Priority

This blueprint converts the latest brand direction into a buildable Astro website system. The visual book governs look and feel; the AI Markdown blueprint carries the complete searchable implementation detail.

STATUS

Brand Guideline Book v2.0 aligned planning baseline

Production inputs such as logo, portfolio proof, public contact, form processor, analytics, and approved bilingual copy remain pending.

1. Latest explicit client approval.
2. Brand Guideline Book v2.0.
3. Brand Implementation v2.0.
4. Website Blueprint v2.0.
5. Client Discovery Strategic Draft V1.
6. Approved content and asset registers.

BLOCKING RULE

A change is incomplete while code, content, QA, assets, or Markdown context is stale.

1.0 Project Summary

Kultivate connects Website Development, SEO, and Social Media Management as one digital growth system.

PROFESSIONAL

MODERN

CREATIVE

CALM

1.0 PROJECT SUMMARY

WEBSITE JOB 01

Generate qualified inquiry

Route the right visitor to a clear next action with enough context for an initial review.

WEBSITE JOB 02

Build credibility

Use selected work, process, deliverables, and verified proof.

WEBSITE JOB 03

Explain the system

Show how foundation, discoverability, distribution, inquiry, and optimization relate.

PRIMARY CTA

Mulai Proyek / Start a Project

Collect objective, needs, timeline, and material readiness.

2.0

Non-Negotiable Requirements

These rules protect the static architecture, visual direction, accessibility, performance, and content integrity.

2.0 NON-NEGOTIABLES

TECHNICAL

- Astro static output.
- No custom backend or database.
- Local content collections.
- Minimal JavaScript.

VISUAL

- Black-dominant field.
- Restrained blue-cyan light.
- Wide, breathable sections.
- No dense dashboard.

EXPERIENCE

- Full ID/EN support.
- Keyboard and focus states.
- Reduced motion.
- Mobile redesigned by priority.

INTEGRITY

- No guarantees.
- No unapproved proof.
- No public placeholder cases.
- No copied reference artwork.

SELECTED APPROACH

Static-first. No heavy WebGL, continuous canvas animation, scroll hijacking, cursor-following light, or effect required to understand content.

3.0

Information Architecture

Navigation stays simple. Locale-prefixed routes create predictable bilingual structure and SEO signals.

PRIMARY NAVIGATION

Work / Services / About / Insights / Contact / Start a Project / ID | EN

ROOT BEHAVIOR

/ redirects to /id/, or serves a minimal language gateway when host-level redirect is unavailable.

3.0 INFORMATION ARCHITECTURE

/id/ · /en/

/id/work/ · /en/work/

/id/work/[slug]/

/en/work/[slug]/

/id/services/

/en/services/

/id/services/[service]/

/en/services/[service]/

/id/about/ · /en/about/

/id/insights/ · /en/insights/

/id/contact/ · /en/contact/

/id/privacy/ · /en/privacy/

4.0

Homepage Blueprint

Help a first-time visitor understand the offer, see credible work quickly, and choose the next relevant action.

HERO BASELINE

Build a digital system that grows together.

Support copy: 24-32 words. Primary CTA: Start a Project. Secondary CTA: View Our Work.

4.0 HOMEPAGE BLUEPRINT

PAGE ANATOMY

Hero → Selected Work → Three Services → Connected System → Why Kultivate → Process → Insights → Final CTA

DENSITY LIMITS

KULTIVATE / WEBSITE BLUEPRINT BOOK

Selected Work: 1 featured + 2 supporting. Services: 3 cards. Process: 4 steps. Insights: maximum 3 entries.

5.0

Page Specifications

Every page has one primary job, a concise information hierarchy, and a clear next action.

5.0 PAGE SPECIFICATIONS

WORK INDEX

Scan relevant capability and select a case study. Add filters only after six meaningful cases.

CASE STUDY

Context → challenge → approach → decisions → deliverables → visual outcome → verified result → CTA.

SERVICES HUB

Three-service architecture, connected-system diagram, starting-point guidance, related work, CTA.

SERVICE PAGE

Proposition, problems, audience, scope, deliverables, process, proof, FAQ, CTA.

ABOUT

Brand story, philosophy, principles, process, approved team and contact information.

INSIGHTS

Useful expertise with owner, date, category, SEO metadata, alt text, and sources.

PROOF RULE

Every public metric includes baseline, period, method, and source. A transparent non-metric outcome is acceptable when verified numerical proof does not exist.

6.0

Content Model

Local typed content collections keep Work and Insights static, structured, bilingual, and auditable.

DATA INTEGRITY

- `translationKey` connects ID and EN.
- `draft: true` stays out of production.
- Metrics require verified proof status.
- Assets require permission in the register.

WORK FRONTMATTER

```
title: ""
slug: ""
locale: "id"
translationKey: "project-key"
services: []
period: ""
featured: false
coverImage: ""
coverAlt: ""
outcomes: []
proofStatus: "pending"
draft: true
```

INSIGHTS FRONTMATTER6.0 CONTENT MODEL

```

updatedAt: ""
sources: []
draft: true
```

7.0

Bilingual System

Indonesian is the writing baseline. English is professionally adapted while preserving intent, proof level, hierarchy, and CTA meaning.

ID

EN

NO FLAGS

EQUIVALENT ROUTES

LOCALIZED SEO

Title, description, Open Graph, alt text, canonical, and hreflang per locale.

SWITCH BEHAVIOR

Preserve the equivalent page and slug when translation exists.

RELEASE RULE

Missing translations block equivalent publication unless explicitly approved.

8.0

Brand Implementation

The interface follows the Brand Guideline Book v2.0 dark editorial system.

Void Black#070B12

Deep Navy#0B1322

Electric Blue#176BFF

Cyan Glow#67D9FF

Cloud White#F4F7FB

Mist#C9D3DF

Steel#7A8798

Slate#273244

TYPOGRAPHY

Instrument Sans

Primary for display, body, navigation, and UI.

SPACE MONO / 01

Short metadata only.

GRAPHIC CUES

Dark field, light as material, modular editorial, digital organic.

8.0 BRAND IMPLEMENTATION

LAYOUT

- 12 / 8 / 4 columns.
- 1280-1440 px max width.
- 96-160 px section space.
- 12-24 px radius.
- 1 px subtle border.

AVOID

Bright fills, glows everywhere, condensed columns, decorative 3D, and sci-fi dashboard styling.

9.0

Component System

Components receive localized content through props and remain semantic before JavaScript enhancement.

CORE PRINCIPLE

Do not bury page copy inside reusable visual components. Global components cannot assume one language.

GLOBAL

Header, footer, locale switch, buttons, SEO, breadcrumbs, skip link.

HOME

Hero, selected work, services, system diagram, principles, process, insights, CTA.

CONTENT

Work card, case sections, article card, rich text, source list, related content.

FORMS

Field, select, consent, error summary, success state, external submission adapter.

INTERACTION

Interactive islands only where native HTML and CSS are insufficient.

TOKENS

Colors, type, spacing, radii, borders, and motion remain in CSS custom properties.

9.0 COMPONENT SYSTEM

10.0

Astro Static Architecture

Every public route is generated at build time. Work and Insights detail pages come from local content collections.

OUTPUT

- No runtime database.
- No custom API route.
- No server-rendered application.
- Minimal hydration.

11.0

Performance, Media & Motion

The selected concept is static-first. Quality comes from composition and craft, not constant animation.

LAZY LOADING POLICY

Prioritize the hero. Lazy-load below the fold.

Every image uses intrinsic dimensions, responsive sources, and an appropriate modern format.

11.0 PERFORMANCE & MOTION

MICRO

**150-250
ms**

CTA, focus, icon.

IMAGE / CARD

**300-600
ms**

Reveal or crossfade.

SECTION

**500-800
ms**

Limited transition.

SCRIPT POLICY

- No global animation library.
- Do not hydrate static UI.
- Defer non-critical scripts.
- Load analytics according to consent.
- Respect reduced motion.

12.0

SEO & Metadata

☐ Unique title and description.☐ Self-referencing canonical.☐ Localized hreflang.☐ One clear H1.☐ Logical heading structure.☐ Open Graph metadata.☐ Descriptive alt text.☐ Structured internal links.

Organization, WebSite, BreadcrumbList, and Article structured data may be added after validation. Do not add review or rating schema without valid evidence.

12.1

Accessibility

☐ Keyboard navigation.☐ Visible focus.☐ Skip-to-content.☐ Semantic landmarks.☐ Correct heading sequence.☐ Localized lang attribute.☐ Form labels and errors.☐ No color-only states.☐ Reduced motion.☐ Verified contrast.

13.0

Inquiry, Measurement & Privacy

The website is static. Inquiry uses an approved external form endpoint, embedded form, or direct contact route.

REQUIRED FIELDS

Name, company, email, WhatsApp, service, summary, objective, target launch, consent.

OPTIONAL FIELDS

Current website/social, indicative budget, attachment when safely supported.

Do not create a custom API or database. Privacy text must match the actual form, analytics, and consent configuration.

PLANNED EVENTS AFTER APPROVAL

- Primary CTA click.
- WhatsApp and email click.
- Form start and success.
- Service page view.
- Case-study view.
- Language switch.
- Download click.

CENTRAL CONFIGURATION

Store public contact, analytics IDs, form endpoint, domain, and site metadata in one configuration source.

14.0

Build Phases

Build the system in an order that prevents design work from hiding missing facts, assets, or decisions.

00

Context & Assets

Update Markdown, confirm logo, contact, domain, work, form, and analytics.

01

Foundation

Astro setup, tokens, typography, routes, navigation, schemas, SEO base.

02

Core Pages

Home, services, about, contact, privacy, and 404.

03

Proof & Content

Work, case studies, insights, approved assets, bilingual review.

04

QA & Launch

Responsive, accessibility, routes, performance, metadata, hreflang, forms, analytics, documentation, final approval, release notes.

15.0

Acceptance Checklist

Sign-off requires brand, content, technical, bilingual, accessibility, and documentation alignment.

15.0 ACCEPTANCE CHECKLIST

☐ No unverified claim or metric.

☐ No public placeholder.

☐ ID and EN complete.

☐ CTA labels consistent.

☐ Background reads black.

☐ Blue/cyan remains restrained.

☐ Layout is not condensed.

☐ No dense dashboard section.

☐ Static build passes.

☐ No backend dependency.

☐ Routes and links pass.

☐ Lazy loading is correct.

☐ Hero is not lazy-loaded.

☐ Minimal client JS.

☐ Keyboard and focus pass.

☐ Reduced motion works.

DOCUMENTATION ACCEPTANCE

All required Markdown files exist, source versions are current, decisions and assets are recorded, content status is synchronized, and changelog matches the handoff.

16.0

AI Context Continuity

Repository Markdown is the operational memory of the project. Read it before working; create missing files; update affected files after every change.

REQUIRED FILES

README.md · PROJECT_CONTEXT.md · WEBSITE_BLUEPRINT.md ·
BRAND_IMPLEMENTATION.md · CONTENT_MATRIX.md · PENDING_INPUTS.md ·
DECISION_LOG.md · ASSET_REGISTER.md · QA_CHECKLIST.md · CHANGELOG.md

DEFINITION OF DONE

Implementation, content, assets, QA, decisions, and Markdown context must all be current.

16.1

Pending Inputs

☐ Approved logo master.

☐ Domain and hosting.

☐ Public email and WhatsApp.

☐ Form processor.

☐ Analytics and consent.

☐ Publishable portfolio.

☐ Asset permissions.

☐ Verified outcomes.

☐ Team assets.

☐ Legal/public details.

☐ Final Indonesian copy.

☐ Reviewed English copy.

No AI or developer may invent a pending value to finish a page.
